

Technology for Lawmakers

Through the years NSI has been selected by the State of Connecticut's Office of Legislative Management to provide a variety of technology products and services.

For example, NSI has sold an IBM ds4300 SAN (storage area network) to the Connecticut General Assembly for Disaster Recovery. NSI was picked on the basis of pre-sales solutions and its prior experience with DR configurations.

NSI has also provided laptops for use by the General Assembly and assisted with the PC roll-out.

"(NSI's) how can I help attitude makes overwhelming tasks seem like daily routines," said Rebecca Fede, a member of the ITS Staff for the General Assembly.
