

## Akwesasne Mohawk Casino Hogansburg, NY

The Akwesasne Mohawk Casino is the perfect example of an early-stage gaming enterprise taking advantage of NSI's vast experience in the gaming and hospitality industries.

NSI's people supported the casino's opening in 1999, providing all servers and desktops to support point-of-sale and accounting systems. Since that time the relationship has grown to NSI becoming a Licensed Vendor for the St. Regis Mohawk Tribe, operators of the casino.

Through the years NSI has performed ongoing network assessments and provided recommendations that have ensured capacity to accommodate the casino's rapid growth. NSI also provided infrastructure for the IGT Slot system, which included servers, racks, storage, switches, networking and integration. NSI continues to provide long-term on-site staff augmentation.

Maintenance Contract Management is another customized service provided to Akwesasne Mohawk. NSI manages all IBM and Dell maintenance agreements for the casino, simplifying an otherwise complex process to one consistent and predictable monthly bill. NSI even finances the maintenance agreement transactions for Akwesasne. Through the use of a special Web portal the casino's IT Department is able to view the current status of their many IBM maintenance plans and other pertinent data.
